

GreenPlanet Nutrients Retailer Resource Guide

For the Global Market

This document was created as a resource for retailers and sales representatives who want to sell GreenPlanet Nutrients.

Every GreenPlanet Nutrient product has the below icons to identify what it is and how to use it.

Icon	Description	Icon category
	This icon symbolizes dry fertilizer .	Fertilizer Type
	This icon symbolizes liquid fertilizer .	
	This icon symbolizes base nutrient .	Nutrient Type
	This icon symbolizes an additive nutrient .	
	This icon symbolizes maintenance product .	
	This icon indicates this product is formulated for use during the vegetative stage of growth.	Plant Growth Stage
	This icon indicates this product is formulated for the flowering stage of growth.	
	Products with this icon can be used in hydroponic systems .	For Use In
	Products with this icon indicates that it can be used in drain to waste application.	
	Products with this icon can be used in soil and soilless mediums .	
	Products with this icon are suitable for recirculating application.	
	The icon indicates that this product can be used as a foliar spray .	
	The icon indicates that this product can be used on outdoor grows .

STATEMENT

At GreenPlanet Nutrients it has always been, and will always be, about the quality and purity of our products. Based in British Columbia, Canada we have implemented our 25 years of craft growing knowledge into the formulation and development of our innovative, high quality plant nutrient products. Whether you are a hobby or commercial grower, our goal is to give you the peace of mind knowing that you will reach new highs in your yields.

Quality Focused. Results Based.

FROM HUMBLE BEGINNINGS

Pacific Northwest Garden Supply Ltd was started by Steven Betts in 1993 with one store in British Columbia, Canada. Having previously worked in the hydroponics industry, Steven had a strong desire to learn and to get involved in the industry by supporting urban agriculture. Shortly after launching the first location, Steven brought on his first partner Justin Cooper to help him with the original PNW location.

For decades, the Pacific Northwest has been home to some of the world's highest quality craft growers. A like-minded community of individuals, historically thriving in the shadows, all the while sharing knowledge and experiences with each other.

It was here that Steven and Justin recognized the need for higher quality, more competitively priced plant nutrients. With this in mind, they began to formulate and then develop what has now become an iconic brand in the industry, GreenPlanet Nutrients.

Plant Feed Programs

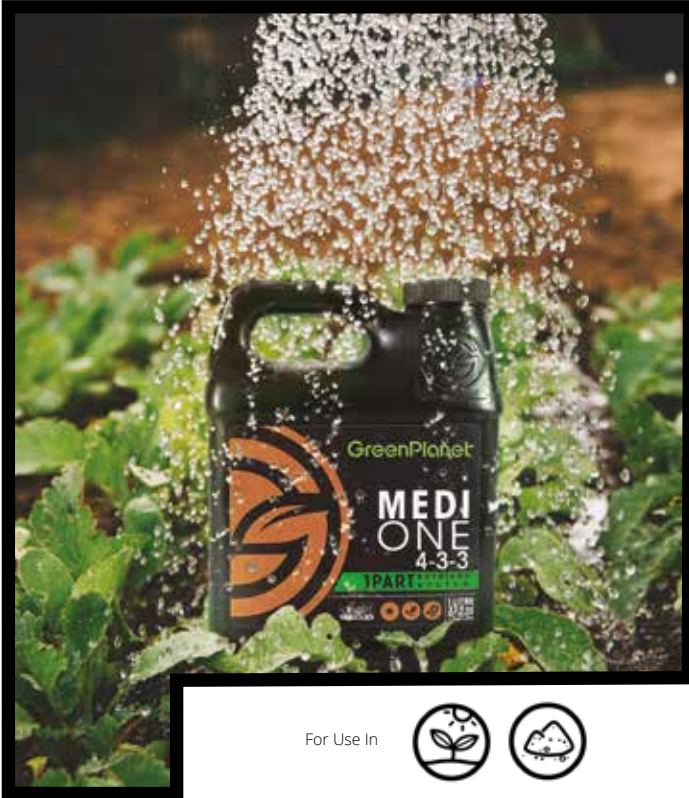

What is a Plant Feed Program?

A feed program is a schedule of plant nutrition that can be mapped in terms of fertilizer dosage, ratio, supplementation, and use over time. Usually containing several bottles, a complete feeding program should contain supplements including a base nutrient fertilizer, a vitamin supplement, a bloom booster, a source of carbohydrates, and a trichome enhancer.

Feed Programs

For Use In

1 Part Medi One Feed Program A Feed Program Formulated for the Medical Grower

Medi-One is a balanced blend of organic ingredients that produce vigorous growth in the vegetative stage and resinous aromatic flora production in the flowering stage. Medi-One is also OMRI listed, which means that the ingredients that go into producing Medi-One are backed against industry standards for organic fertilizer production.

Learn More About this Feed Program

Scan to read the blogs on our website to learn more about the [1 Part Medi-One Feed Program](#):

Scan the QR code to learn more about this feed program

Feed Program Benefits:

OMRI Listed

The formula for Medi-One is backed against OMRI's standard for organic fertilizer production. This ensures that the ingredients formulated in Medi-One are:

- Consistent
- Quality-Driven
- Organic
- Readily Available Elements

Unlike granular or powdered organic fertilizers, the elements in Medi-One are instantly bio-available.

Unique Ingredients

Medi-One is formulated from multiple organic sources including hydrolyzed, slow-steamed Atlantic Menhaden, sea kelp, naturally sourced potassium sulfate and a variety of micronutrients like copper, boron, manganese and zinc.

Award Winning

Medi-One helped grow Medi-Kush, winner of the Medical Cannabis Cup in 2011.

Blog #3: What an OMRI Listed Product Can Do for Your Garden

Feed Program Contains:

- 1 Part Base Nutrient** – Medi-One
- 4 Additives Nutrients** – Ocean Magic / Massive Bloom Formulation / Rezin / Liquid Weight

For Use

2 Part Dual Fuel Feed Program Feed program designed to save growers time and money.

Whether you're a novice cultivator with your first grow tent or a master grower producing on a commercial scale, our 2 part Dual Fuel Feed Program gives you the ability to fine-tune your garden to ensure you get bigger and better yields. Simple and easy to use so you can scale up or down without the headache.

Blog #1: Growers Who Should Be Using Dual Fuel in the Garden

Blog #2: Understanding the Feed Program: Dual Fuel

Blog #3: Simple and Easy to use 2 Part Dual Fuel Base Nutrient System that delivers every time

Feed Program Benefits:

pH Stable

When properly mixed, Dual Fuel 1 & 2 sets perfectly in water at a pH between 6.0 – 6.2, making it one of the easiest and most reliable fertilizers on the market.

Packed with Essential Ingredients

A brief consultation with the guaranteed analysis of Dual Fuel 1 & 2 will reveal an aggressive, yet balanced list of essential elements.

Highly Concentrated

Dual Fuel 1 & 2 are hyper-concentrated, with the average application (depending on plant age, size and stage) coming in at 1.0 – 2.0 ml per liter.

Easy to Use 1:1 Ratio

Dual Fuel 1 & 2 is designed to be mixed at 1:1 ratio in both vegetative and flowering growth.

High Value (Get More for Less)

The Dual Fuel 2 Part Program is the most affordable feed program from GreenPlanet Nutrients – it offers growers more for less by being economical, easy to use and hyper-concentrated.

Feed Program Contains:

2 Part Base Nutrient – Dual Fuel 1 & 2
4 Additive Nutrients –
Vitathrive / Massive Bloom Formulation /
Rezin / Liquid Weight

3 Part GP3 Feed Program Formulated for the veteran grower

GP3 is the OG of 3 part feed programs. It's the 3 part base nutrient system that has been tried and tested by seasoned growers throughout the years. If you want a product backed by veteran growers then this is the feed program for you.

Learn More About this Feed Program

Scan to read the blogs on our website to learn more about the [3 Part GP3 Feed Program](#):

Scan the QR code to learn more about this feed program

Feed Program Benefits:

Contains No Dyes or Synthetic Colours

Unlike our competitors, GP3 contains only what your plants need to thrive.

Increased Flexibility and Control

Allows for more control over the levels of nutrients your plants receive than a traditional 2 part system.

Low Salt Index

GP3 is a super clean product: each part of the system goes through a rigorous filtration process during production to leave absolutely no sediment or residue in your reservoir once mixed.

100% Chelated Micronutrients

All the micronutrients in GP3 are 100% chelated, so you can be sure your plants will get the micronutrients they need to thrive.

Seamlessly Integratable

Each part of the GP3 program can be seamlessly integrated into any 3 part feeding program.

Blog #1: Understanding the Feed Program: Hydro Fuel

Blog #2: Everything You Need to Know About GreenPlanet's Hydro Fuel

Blog #3: How to Choose a GreenPlanet Liquid Feed Program

Feed Program Benefits:

Highly Controllable

Hydro Fuel gives growers extreme control over both vegetative and flowering growth with two specific and balanced formulas for each stage of production.

Easy to Use

Each bottle of the 4 Part program is used in equal ratios, making it one of the easiest to use fertilizers on the market.

Plant Stage Specific

The specific vegetative and flowering ingredients in each part of the Hydro Fuel program is designed for growers who want assured outcomes in growing and flowering production.

Traditional

4 Part feeding programs are classic. Some growers continue to use feeding programs they trust and understand.

Feed Program Contains:

4 Part Base Nutrient – Hydro Fuel Grow A & B / Hydro Fuel Bloom A & B

4 Additives Nutrients – Vitathrive / Massive Bloom Formulation / Rezin / Liquid Weight

AutoPot 2 Part Dual Fuel Feed Program Feed program designed to save growers time and money

This 2 Part Dual Fuel Feed Program was designed specifically for AutoPot Watering Systems. It allows for seamless integration, maximum results, and bigger yields in a variety of AutoPot systems.

Learn More About this Feed Program

Scan to read the blogs on our website to learn more about the [AutoPot 2 Part Dual Fuel Feed Program](#):

Scan the QR code to learn more about this feed program

Feed Program Benefits:

pH Stable

When properly mixed, the AutoPot 2-Part program sets perfectly in water at a pH between 6.0 – 6.2, making it one of the easiest and most reliable fertilizers on the market.

Packed with Essential Ingredients

The AutoPot 2-Part program is hyper-concentrated, with an average application (depending on plant age, size, and stage) coming in at 1.0 – 2.0 ml per liter.

Highly Concentrated

Dual Fuel 1 & 2 are hyper-concentrated, with the average application (depending on plant age, size and stage) coming in at 1.0 – 2.0 ml per liter.

Easy to Use 1:1 Ratio

The base nutrients in the AutoPot 2-Part program are designed to be mixed at a 1:1 ratio in both vegetative and flowering growth.

Extremely Water Soluble

The AutoPot 2-Part feeding program is designed to be extremely water-soluble. This characteristic of the AutoPot 2-Part feed programs leads to a cleaner reservoir, fewer clogged lines, and an AutoPot system that requires less maintenance overall.

The AutoPot 3-Part feeding program is designed to be extremely water-soluble. This characteristic of the AutoPot 3-Part feed programs leads to a cleaner reservoir, fewer clogged lines, and an AutoPot system that requires less maintenance overall.

Feed Program Contains:

3 Part Base Nutrient – GP3 Grow/ Bloom / Micro
3 Additives Nutrients –
Vitathrive / PK Spike / Rezin

Outdoor 2 Part BackCountry Feed Program Slow Release Granular Formula formulated for outdoor grower

The Backcountry Blend (BCB) feed program is an economic choice for gardeners who wanted to spend less, save time and expend less labour in the process of getting the same reliable results. The base nutrient component comes in two parts: BCB Grow and BCB Bloom.

Learn More About this Feed Program

Scan to read the blogs on our website to learn more about the [Outdoor 2 Part BackCountry Feed Program](#):

Scan the QR code to learn more about this feed program

Feed Program Benefits:

Save Time

BackCountry Blend (BCB) saves growers time by being the simplest and most aggressive slow-release formula on the market. Here are some of the time-saving qualities of the BCB feeding program:

- Monthly Feeding (every 3-4 weeks)
- No Mixing
- No Buffering
- Easy Application

Save Money

BackCountry Blend is the only feed program that promises economic nutrition without compromising results.

Save Labour

With a slow-release fertilizer like BackCountry Blend, you can expect a massive decrease in labor with capabilities like:

- Water Only Irrigation
- Minimal Application
- Easy to Train Staff
- No Water Reservoirs Needed (Perfect for Irrigation Systems)

Base Nutrients

What is a Base Nutrient?

This icons represents the foundation of a plant's diet. Base nutrients provide all the necessary elements for plant growth such as Nitrogen, Phosphorus, Potassium, Calcium, Magnesium, Iron, Manganese, Zinc, Sulfur, and several other minor elements.

Scan To Browse All
Base Nutrients

BackCountry Blend Bloom

BackCountry Blend Bloom is a controlled release granular base nutrient specifically formulated for the blooming stage of growth.

Full Spectrum of Macronutrients

BCB Bloom contains a full spectrum of nitrogen (N), phosphorus (P), potassium (K), and calcium (Ca) that are measured specifically for the flowering stage.

Easy to Use

BCB Bloom is a slow-release fertilizer that requires no mixing or buffering.

Low Application Rate

The low application rate makes feeding simple by only requiring application every 3-5 weeks so you can focus on tending to your plants to get the best results possible.

For Use

BackCountry Blend Grow

BackCountry Blend Grow is a controlled release granular base nutrient specifically formulated for the vegetative stage of growth.

Full Spectrum of Macronutrients

BCB Grow contains a full spectrum of nitrogen (N), phosphorus (P), potassium (K), and calcium (Ca) that are measured specifically for the vegetative stage.

Mother Plants

BCB Grow is a slow-release fertilizer that requires no mixing or buffering and can be used on mother plants that are either indoors or outdoor.

Low Application Rate

The low application rate makes feeding simple by only requiring application every 3-5 weeks so you can focus on tending to your plants to get the best results possible.

For Use

Dual Fuel 1 & 2

Dual Fuel is a 2 part base nutrient that is easy and simple to use. Whether you're a novice or master grower, Dual Fuel can be tailored to the demands of your grow.

pH Stable & Clean.

When mixed correctly, Dual Fuel 1 & 2 will be set at an ideal pH range (approximately 6.0 - 6.2). Super Clean in emitters and works well in Hydro.

Easy 1:1 Ratio

Dual Fuel 1 & 2 is designed to be mixed in a 1:1 ratio from vegetative to flowering growth.

Hyper Concentrated & High in Cal Mag.

Dual Fuel 1 & 2 has an average application rate of 0.5 - 2.5 ml/L (2-10 ml/gal), making it one of the most concentrated base nutrient solutions on the market.

For Use

2-1-6

GP3 Grow

This 3-Part Base Nutrient System consists of a combination of primary, secondary, and micronutrients in three separate formulas.

Highly Controllable

Allows more control over the levels of nutrients your plants receive than a traditional 2-part system.

Contains No Synthetic Dyes

Unlike our competitors, GP3 contains no synthetic dyes or colouring additives.

Seamlessly Integratable

GP3 Bloom, Grow, and/or Micro can be integrated into any three-part program on the market.

For Use

0-5-4

GP3 Bloom

This 3-Part Base Nutrient System consists of a combination of primary, secondary, and micronutrients in three separate formulas.

Highly Controllable

Allows more control over the levels of nutrients your plants receive than a traditional 2-part system.

Contains No Synthetic Dyes

Unlike our competitors, GP3 contains no synthetic dyes or colouring additives.

Seamlessly Integratable

GP3 Bloom, Grow, and/or Micro can be integrated into any three-part program on the market.

For Use

5-0-1

GP3 Micro

This 3-Part Base Nutrient System consists of a combination of primary, secondary, and micronutrients in three separate formulas.

Highly Controllable

Allows more control over the levels of nutrients your plants receive than a traditional 2-part system.

Contains No Synthetic Dyes

Unlike our competitors, GP3 contains no synthetic dyes or colouring additives.

Seamlessly Integratable

GP3 Bloom, Grow, and/or Micro can be integrated into any three-part program on the market.

For Use

B: 1-2-5

Hydro Fuel Grow A & B

Hydro Fuel Grow A & B is the vegetative component of the Hydro Fuel 4 part base nutrient system, designed to allow for more control and diversity in your feeding regimen during the vegetative stage of growth.

Highly Controllable

Hydro Fuel Grow A & B offers growers more control in the garden versus traditional 2 or 3 part feeding programs.

Easy to Use

Each bottle of Hydro Fuel is designed to be used in equal ratios, making it one of the easiest to use fertilizers on the market.

Plant Stage Specific

The specific ingredients in the vegetative and flowering formulations in the Hydro Fuel feed program are designed for growers who want to assure outcomes in both growing and flowering stages.

For Use

A: 4-0-3

B: 0-4-5

Hydro Fuel Bloom A & B

Hydro Fuel Bloom A & B is the flowering component of the Hydro Fuel 4 part base nutrient system, designed to allow for more control and diversity in your feeding regimen during the blooming stage of growth.

Highly Controllable

Hydro Fuel Bloom A & B offers growers more control in the garden versus traditional 2 or 3 part feeding programs.

Easy to Use

Each bottle of Hydro Fuel is designed to be used in equal ratios, making it one of the easiest to use fertilizers on the market.

Plant Stage Specific

The specific ingredients in the vegetative and flowering formulations in the Hydro Fuel feed program are designed for growers who want to assure outcomes in both growing and flowering stages.

For Use

4-3-3

Medi One

Medi One is our one-part base nutrient system formulated with readily available macro and microelements for organic use.

OMRI Listed for Organic Use

The formula in Medi-One is backed against OMRI-listed standards for organic crop production. This ensures that the ingredients in Medi-One are organic, quality-driven, and consistent.

Readily Available Elements

The ingredients in Medi-One are instantly bio-available to plants. Great for any plant and vegetable. Multi-use for plant health and vigor.

Award-Winning

Medi-One is the fertilizer used to win the Medicinal Cannabis Cup in 2011.

For Use

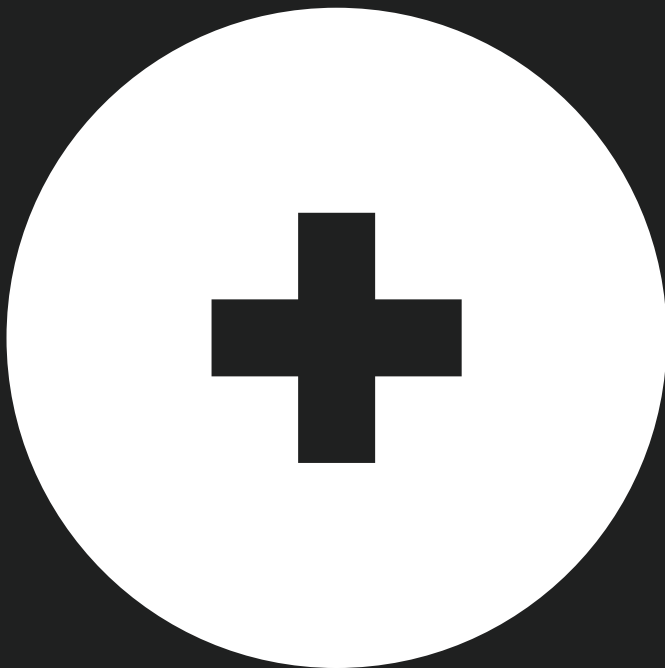

Additive Nutrients

What is an Additive Nutrient?

The icon below means that these particular products can be added to a plants diet to optimize performance in a specified area such as aroma or bloom.

Scan To Browse All Additive Nutrients

Vitathrive

Vitathrive Propagation Solution is our comprehensive additive blend of vitamins and minerals formulated for the vegetative stage of plant growth.

Offer Plants a Source of Stress Release

One of the main components of Vitathrive, vitamin B1, helps reduce the stresses that come from rapid cell growth, environmental conditions, and heavy fruit loads.

Expand Roots and Aid in Propagation

Along with the added B-vitamins, Vitathrive contains a source of potassium that aids in expanding and strengthening the root zone during propagation.

For Use

Ocean Magic

Ocean Magic is an additive derived from Atlantic Sea Kelp that delivers a variety of benefits to your garden and plants.

Loaded with Natural Plant Hormones

Sea Kelp is a natural source of plant hormones that increase root development, vertical growth, and horizontal branching.

Root Soak and Foliar Spray Applications

Ocean Magic can be used as both a root soak and foliar spray during the vegetative stage of growth.

For Use

Liquid Weight

Liquid Weight is a supplement blend of simple and complex carbohydrates that support the plant and beneficial microbial life in the root zone.

Expansive Blend of Carbohydrates that Support Microbes

Liquid Weight is an expansive blend of carbohydrates that the plant and beneficial microbes utilize as a food source during the flowering stage.

For Use

Rezin

Rezin is our flowering additive formulated to enhance the natural processes within flowering plants that produce flavour and aroma.

Natural Flavour and Aroma Enhancer

Rezin contains no plant growth regulators (PGRs) and can be used alongside both mineral and organic fertilizers to naturally enhance flavours and aromas.

Enhance Flowers During Flush

Rezin will also not impact the PPM/EC of your nutrient solution so you can continue to run your base nutrients at full strength, or, continue to enhancer flowers during the flushing period.

No NPK

It can be added to any plant feed program without affecting PPM. It will drop pH.

Massive

Massive Bloom Formulation is our premier flowering additive formulated with all of the necessary microelements required to achieve an increase in flower size as well as providing several additional beneficial properties.

Full-Array of Flowering Elements

Massive Bloom Formulation contains all the essential elements your plants require during the flowering stage. **Great In Soil.**

Formulated with a Unique Blend of Carbohydrates

Massive Bloom Formulation is formulated with a unique blend of carbohydrates, designed to support the energy expenditures of plants during the blooming stage.

PK Spike

PK Spike is our flowering supplement derived from multiple, highly soluble sources of phosphorous and potassium. This product is designed to encourage budding, help facilitate bulking, and ripening of flowering plants.

Highly Soluble

PK Spike is formulated with highly concentrated, yet extremely soluble sources of phosphorus and potassium.

Loaded with (P) and (K)

With an N-P-K of 0-14-15, PK Spike is GreenPlanet's most concentrated blooming additive.

Super Concentrated

Less is more with this product. No carb source.

Pro Cal

Pro-Cal is an excellent supplemental source of essential elements that plants require at all stages of growth.

Designed to Remedy Common Micronutrient Deficiencies

Pro-Cal provides readily available calcium and magnesium, as well as iron, nitrogen, boron, and zinc to ensure your plants do not come up short when they are ready for rapid growth.

Affordable

Cost-effective with available ready irons to assist with varying pH levels.

For Use

Plant Guard

Plant Guard is our potassium silicate supplement used in the vegetative and flowering stages of growth. Silicate increases the rigidity of your plant's cell walls to support a heavier harvest and increase resistance to environmental stress.

Loaded with Natural Plant Hormones

The potassium silicate in Plant Guard is a vital element that plants use at the cellular level to build up natural plant defenses through cell wall development.

Affordable

Cost-effective potassium silicate supplement.

For Use

GPH Uptake

GPH Uptake is a liquid humic acid supplement that greatly improves the availability and uptake of nutrients from the soil.

Nutrient Catalyst

GPH can help with general nutrient uptake, as humic acids cause a catalyst reaction in the root zone when fed alongside hard-to-uptake elements such as calcium or silicate.

Nutrient Chelator

GPH cloaks nutrient elements in a ring of charged molecules that help facilitate its movement into and through cell walls, leading to the express transport of micro and macronutrients.

For Use

GPF Uptake

GPF Uptake is a water-soluble fulvic acid supplement designed for use in hydroponic systems.

Nutrient Catalyst

Rezin contains no plant growth regulators (PGRs) and can be used alongside both mineral and organic fertilizers to naturally enhance flavours and aromas.

Nutrient Chelator

GPF cloaks nutrient elements in a ring of charged molecules that help facilitate its movement into and through cell walls, leading to the express transport of micro and macronutrients.

For Use

BackCountry Blend Boost

Backcountry Blend Boost is a controlled release granular bloom additive designed specifically for the outdoor garden.

Full Spectrum of Macronutrients

BCB Boost is loaded with balanced amounts of phosphorus (P), potassium (K), and calcium (Ca) that are measured specifically for the flowering stage.

Easy to Use

BCB Boost is a slow-release fertilizer that requires no mixing or buffering.

Low Application Rate

The low application rate makes feeding simple by only requiring application every 3-5 weeks so you can focus on tending to your plants to get the best results possible.

For Use

Bud Booster

Bud Booster is a specialty flowering additive used in conjunction with your regular fertilizer program. It helps promote blooming and assists in the plant's metabolism during the middle of the flowering stage.

Loaded with P and K

Bud Booster is our original powdered bloom additive that delivers high amounts of phosphorus (P) and potassium (K) to your plants.

Economical

Bud Booster has a long shelf life as is more affordable than liquid bloom boosters.

Highly Concentrated

The average use rate of Bud Booster is 6 grams per 20 liters or 1 teaspoon per 5 gallons, making it one of the most concentrated formulas on the market.

For Use

Karbo Boost

Karbo Boost is a powdered supplement that delivers an added source of carbohydrates for microbial life during the flowering stage.

Affordable and Long-Lasting Microbe Food

Karbo Boost supplies your plants with a clean and natural source of carbohydrates to ensure your plants are getting an added clean source of energy to support heavy fruiting.

Cost-effective and great for outdoors.

For Use In

0-0-62

Horti rawK (Dense)

Dense Bud Compactor(Horti rawK) is a flowering additive with a specially formulated blend of potassium, which can be used separately from your regular feeding program.

Heavy (K) Content

By introducing a 0-0-62 straight potassium formula, Dense (Horti rawK) ensures you get maximum weight out of your flowers.

Easy to Use

Just mix Dense(Horti rawK) as a standalone product into your reservoir once a week, three weeks before flush, allowing for a 14 day flushing period.

Highly Concentrated

Use Dense(Horti rawK) at 1-2 grams per 1 liter (4-8 grams per 1 gallon) of water.

For Use In

Root Builder

Root Builder is our root zone inoculant comprised of specifically selected beneficial bacillus bacteria. It promotes a healthy and active root zone at all stages of growth.

Designed with Clean and Select Sources of Beneficial Bacteria

Root Builder introduces two key forms of beneficial bacteria that help protect and expand your root zone: Bacillus licheniformis and Bacillus subtilis.

High Spore Count

Root Builder contains 100,000,000 cfu/mL of both Bacillus licheniformis and Bacillus subtilis.

For Use In

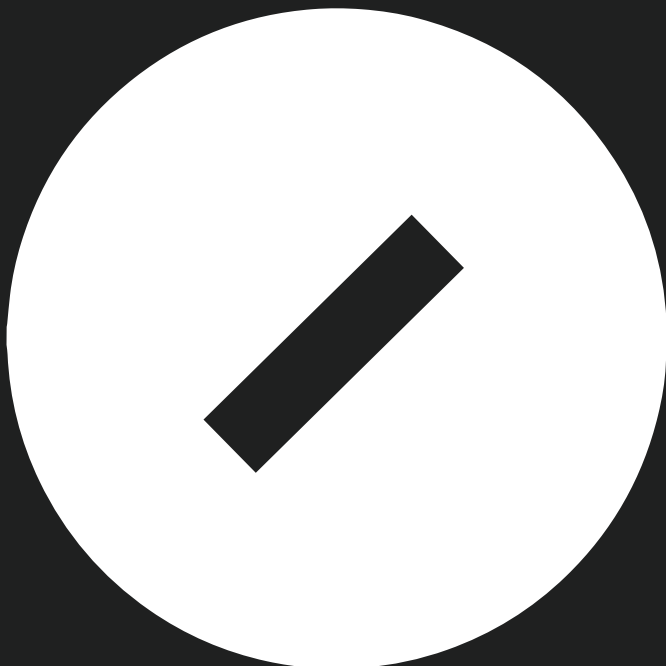

Maintenance Products

What is a Maintenance Product?

Some of our products specialize in maintaining or preserving a particular area in a plant's life cycle, such as pH levels.

Scan To Browse All
Maintenance Products

pH Down

pH Down is our highly concentrated premium acid formula made to help maintain and lower the pH of a nutrient solution.

Safe, Clean, and Highly Concentrated

Our premium concentrated pH Down offers a clean formula for growers needing to safely lower the pH levels in their garden.

40% Concentration Level

For Use

DANGER: CORROSIVE

pH Up

pH up is our highly concentrated premium alkaline formula made to help maintain and raise the pH of a nutrient solution.

Safe, Clean, and Highly Concentrated

Our premium concentrated pH Up offers a clean formula for growers needing to safely raise the pH levels in their garden.

47% Concentration Level

For Use

CAUTION: IRRITANT
