

GP3 Grow Base Nutrient Liquid Fertilizer

GP3 Grow is an essential component of the 3 Part base nutrient system. Grow provides your plants with the optimal array of nutrients they need for the vegetative stage. Part of the GP3 Feed Program.

Base Nutrient

Liquid Fertilizer

Vegetative Stage

HOW IT WORKS

GP3 Grow is the component of the GP3 nutrient system that provides your plants with the optimal nutrients they require in the vegetative stage of growth. This stage is when your plants develop leafy green foliage and a strong root system that will be able to support flowering sites during the bloom stage. The Grow formula contains no synthetic dyes and contains only ethically sourced ingredients to ensure your plants are getting the highest quality nutrients possible. These include nitrogen (N) and soluble potash (K₂O), which plants require in large amounts to thrive. Nitrogen is vital to the process of photosynthesis and producing chlorophyll, which is responsible for green and healthy growth and increased yields. The soluble potash helps with the plant's ability to resist diseases and encourages functions that will help your plant transition into the bloom stage. When used alongside GP3 Micro and GP3 Bloom, your plants will receive the primary, secondary, micro, and macronutrients they need for a bountiful harvest.

HOW TO USE IT

GP3 requires Grow, Micro, and Bloom for the best results. Refer to the GP3 Feed Program for application rates during each stage of plant growth. Mix each product individually into the reservoir, check the PPM, pH and adjust accordingly.

CAUTION: Combining GP3 components together in an undiluted form may cause nutrient lockout. Always mix into the reservoir separately. Follow the GP3 Feed Program for the best results.

For optimal results follow the GP3 Feeding Program during the plant's entire life cycle.

For Use In

HYDROPONICS

CAPABLE TO GROW

PERFECT LEAFING

SOIL / SOILLESS

Product Benefits:

Contains No Dyes or Synthetic Colours

Unlike our competitors, GP3 contains only what your plants need to thrive.

Increased Flexibility and Control

Allows for more control over the levels of nutrients your plants receive than a traditional 2 part system.

Low Salt Index

GP3 is a super clean product: each part of the system goes through a rigorous filtration process during production to leave absolutely no sediment or residue in your reservoir once mixed.

100% Chelated Micronutrients

All the micronutrients in GP3 are 100% chelated, so you can be sure your plants will get the micronutrients they need to thrive.

Seamlessly Integratable

Each part of the GP3 program can be seamlessly integrated into any 3 part feeding program.
