*Ky program ushqimi është një udhëzues i përgjithshëm

SHËNIME TË RËNDËSISHME PËR PËRDORIMIN:

Measure carefully. A small amount goes a long way.

Since climate and temperature can affect nutrient release, in warmer temperatures use the minimum applicable amount and in cooler temperatures use the maximum applicable amount.

Fertilize around the drip line (by definition, this means that if you watered the plant with a sprinkler system and the water drips, it leaves a distinct drip ring or line around the plant).

It is assumed that the height and width above ground is equivalent to that below ground. That said, a 30.48 cm tall plant has a significantly smaller drip ring than a 91.44 cm tall plant.

PËRZIERJA E THJESHTË ËSHTË E FORMULUAR PËR KULTIVUESIT NË HAPËSIRA TË JASHTME
