

**CARBOHDRATE ADDITIVE
THAT DELIVERS A VITAL
SOURCE OF FOOD FOR
MICROBIAL LIFE IN THE
ROOT ZONNE**

KARBO BOOST

 LIQUID FERTILIZER  ADDITIVE NUTRIENT  FLOWERING STAGE

WHAT IT IS

Karbo Boost is a powered supplement that delivers an added source of carbohydrates for microbial life during the flowering stage. This encourages the rapid expansion of beneficial microbe colonies in the grow medium.

HOW IT WORKS

Carbohydrates supply microbes with a vital source of food they need to thrive in the root zone of your plants. Our formula uses naturally occurring carbohydrates to ensure your plants are getting an added clean source of energy to support heavy fruiting. An added source of carbohydrates is important during the flowering stage to ensure microbes can help your plants uptake the nutrients they need to produce a healthy and aromatic crop. These microorganisms can help break down larger elements into simple chemical components that are easier for your plant to uptake and absorb. Healthy microbial life in the rhizosphere not only helps mobilize nutrients, it also benefits water and oxygen absorption in the root zone for faster and stronger growth. The end result is a significant increase in flower weight, taste, and overall yield.

HOW TO USE IT

Dissolve 1 oz (30 g) of Karbo Boost into 25 gallons of water. Use every watering throughout the flowering cycle.

FOR USE IN

OUTDOORS

HYDROPONICS

DRAIN TO WASTE

RECIRCULATING

SOIL / SOILLESS
