

Are you looking for a cost-effective feed program?

Then the 2 Part Dual Fuel Feed program is for you

Feed Program Benefits

- pH Stable
- Packed with Essential Ingredients
- Highly Concentrated
- Easy to Use 1:1 Ratio

Understanding the Feed Program: Dual Fuel

Topics Covered:

- What is a feed program?
- The 2 Part Dual Fuel Feed Program
- Feeding tips and considerations

Meet GreenPlanet Nutrients Dual Fuel feed program – the 2-part nutrient system which emphasizes simplicity, reliability and results in the garden. Built for beginners, experts, hobbyists and commercial growers, the Dual Fuel feeding system makes no apologies for being the easiest and most economical fertilizer on the market. Testing has shown that using Dual Fuel alone would reasonable ensure a successful harvest; however, by combining GreenPlanet's aggressive 2-part formula with other additives like Vitathrive, Massive Bloom Formulation, Rezin and Liquid Weight, a confident outcome is not only probably, but guaranteed.

Growers Who Should Be Using Dual Fuel in the Garden

Topics Covered:

- The Novice
- The Expert
- The Commercial Grower & Minimalist

There has always been a large debate centered around the benefits of organic versus synthetic farming. It's clear that mineral-based fertilizers have their place in specific hydroponic systems, for instance, in recirculating reservoirs or aeroponic applications. But for gardeners who prefer to produce crops in coco or peat-based mediums, the debate is left wide-open, as a drain to waste garden utilizes chemicals, organics or mixed-method approaches to nutrient enrichment easily and with little resistance throughout the plant's life cycle. Being that the garden is full of variables, the choice that will provide a heavier, more quality-driven crop is often shadowed by more important factors such as plant genetics, environmental conditions and gardening techniques; although, in specific situations, it's evident that choosing the right fertilizer can make or break a garden.

2 PART DUAL FUEL FEED PROGRAM

Drain To Waste | Recirculating

 LIQUID FERTILIZER

A simple and highly concentrated feed program designed to save growers time and money.

FOR USE IN:

SOIL / SOILLESS

HYDROPONICS

DRAIN TO WASTE

RECIRCULATING

FEED PROGRAM CONTAINS

- DUAL FUEL 1
- DUAL FUEL 2
- ⊕ VITATHRIVE
- ⊕ REZIN
- ⊕ MASSIVE
- ⊕ LIQUID WEIGHT
