Understanding the Feed Program: GP3

Topics Covered:

- What is a feed program?
- The "parts" of the GP3 program
- Feeding tips and considerations

GreenPlanet's 3-Part (GP3) feed program consists of a three-part base nutrient system and several additives that enhance both vegetative and blooming growth. Made for the expert grower, GP3 offers plants everything they need in 3 bottles. From essential micronutrients like copper, boron, and zinc, to balanced levels of nitrogen, phosphorus, and potassium, GP3 is fed to plants in varying ratios throughout stages of propagation, growth, and bloom, making them the perfect stack of fertilizer for growers who want nothing but the best. Specialty additives like plant tonics, bloom boosters, resin enhancers, and carbohydrate supplements are also included in all of GreenPlanet's feed programs.

3 Part GP3 FEED PROGRAM

Drain To Waste | Recirculating

LIQUID FERTILIZER

Formulated for the veteran grower, GP3 offers increased flexibility, control and reliability.

FOR USE IN:

SOIL / SOILLESS

HYDROPONICS

DRAIN TO WASTE

RECIRCULATING

FEED PROGRAM CONTAINS

- GP3 GROW
- GP3 MICRO
- GP3 BLOOM
- VITATHRIVE
- REZIN
- MASSIVE
- LIQUID WEIGHT
